

Data Analysis in Biology

BIO144
FS 2022

University of
Zurich^{UZH}

BIO
144

Overarching goals of the course

- ▶ Provide a solid foundation for answering biological questions with quantitative data.
- ▶ Help students to understand the language of a statistician.
- ▶ Ability to understand and interpret results in research articles.
- ▶ Give the students a challenging, engaging, and enjoyable learning experience.

Why is statistical data analysis so relevant for the biological and medical sciences?

Only with knowledge of data and statistical data analysis will it be possible to analyze your data from Bachelor, Master or PhD theses....

- ▶ **Medicine:** What is the effect of a drug? Which factors cause cancer?
- ▶ **Ecology:** What is a suitable habitat for a certain animal? Which resources does it need or prefer?
- ▶ **Evoloutionary biology:** Do highly inbred animals have decreased chances to survive or reproduce?

The “**hottest skill**”
that got people
hired in 2014?

— BETTER DATA. BETTER DECISIONS. BETTER LIVES. —

A global network using data to achieve the Sustainable Development Goals - improving lives, fighting inequality, and promoting environmental sustainability.

Who We Are

The Global Partnership for Sustainable Development Data is a global network working together to ensure the new opportunities of the data revolution are used to achieve the Sustainable Development Goals.

[ABOUT US](#)

Our Community

Our hundreds of partners from governments, the private sector, and civil society organizations are joining forces to take action, galvanize political commitment, build trust, and spur innovation in the booming data ecosystems of the 21st century.

[SEE OUR PARTNERS](#)

Our Impact

Since our founding in 2015, our network has improved data to monitor and achieve the Sustainable Development Goals, created incentives for new commitments to fund and share data, and enabled knowledge-sharing, bringing partners together to make change.

[LEARN MORE](#)

Examples of insights from data

Otter (*lutra lutra*)

Research questions: What is the preferred habitat by otters? How do otters adapt to human altered landscapes?

Method: Study in Austria, 9 Otter were radio-tracked and monitored during 2-3 years.

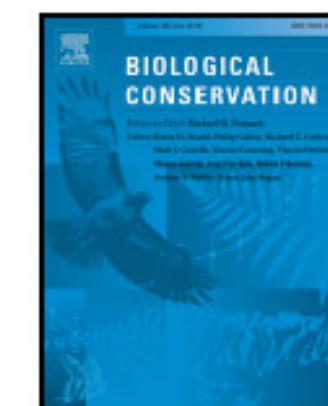

[Biological Conservation 199 \(2016\) 88–95](#)

Contents lists available at [ScienceDirect](#)

Mercury (Hg) in the soil

Wohnzone im Wallis von Quecksilber vergiftet

Vor über vierzig Jahren hatten 3,1 Tonnen Quecksilber einen Abflusskanal nahe der Walliser Gemeinde Visp verschmutzt. Noch heute müssen die Einwohner mit den Folgen leben.

Artikel zum Thema

Konvention gegen Quecksilber verabschiedet

Ein neues internationales Abkommen schränkt die Verwendung von Quecksilber in der Industrie ein. Massgeblich daran beteiligt war die Schweiz. [Mehr...](#)

19.01.2013

Research question: Is the Hg level in the environment (soil) of people's homes associated to the Hg levels in their bodies (urin, hair)?

Method: Measurements of Hg concentrations on people's properties, as well as measurements and survey of children and their mothers living in these properties.

Highly delicate, emotionally charged, political question!

► Schweiz Aktuell, 20. Juni 2016

Physical activity in children (Splashy study)

University of
Zurich^{UZH}

BIO
144

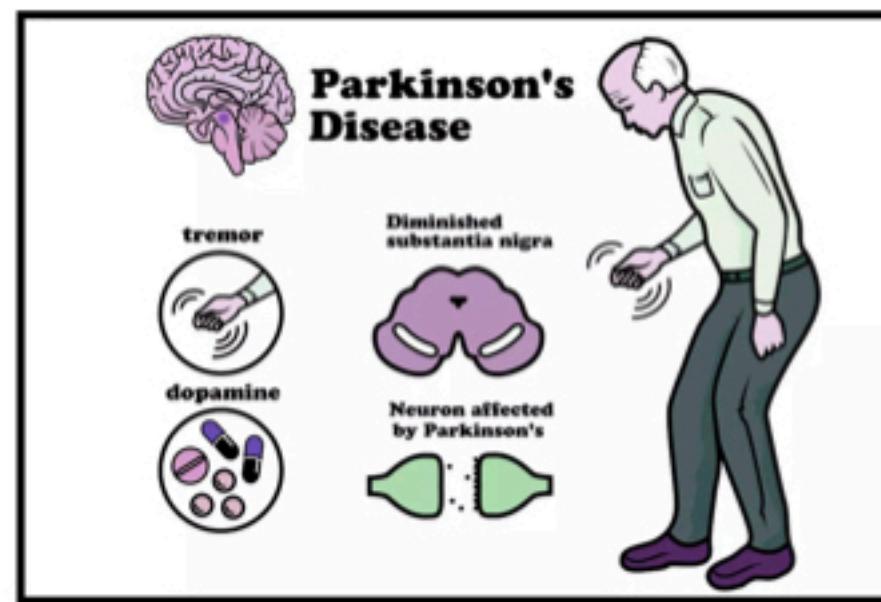

splashy.ch

Research question: Which factors influence physical activity patterns in children aged 2-6 years?

Method: The children had to wear accelerometers for several days. In addition, their parents had to fill in a detailed questionnaire.

Observed variables were, e.g., media consumption, behavior of the parents, age, weight, social structure,...

Question you will work on

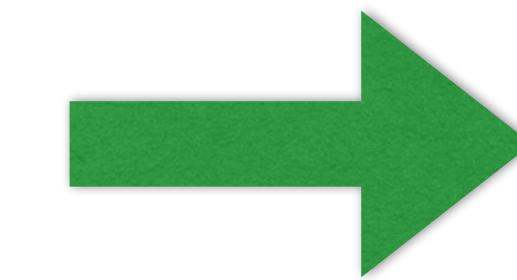

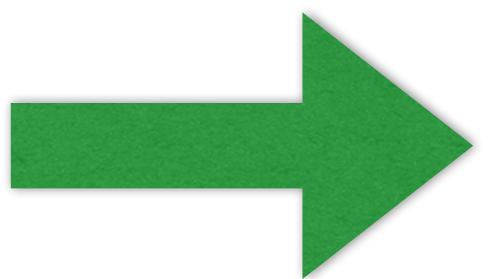

Producing nonsense with statistics... .

... is too easy ...

The risks of alcohol (by David Spiegelhalter, 23. August 2018)

“Calling bullshit” course (University of Washington)

A profound knowledge of data analysis and statistics protects you from producing nonsense – and helps to detect it.

How do we get insights from data... .

... rather than nonsense.

- ▶ Excellent data management practices.
- ▶ Informative graphical visualisations to explore data.
- ▶ Informative numerical summarise to explore data.
- ▶ Appropriate transformations of data.
- ▶ Appropriate statistics tests / models.

Awareness of our “realm”:

- ▶ Description of patterns, including associations (we will do this).
- ▶ Predicting (we will do this).
- ▶ Inferring causation (we will do this, by analysing experiments randomised manipulations).

"Failure is an opportunity to grow"

GROWTH MINDSET

"I can learn to do anything I want"

"Challenges help me to grow"

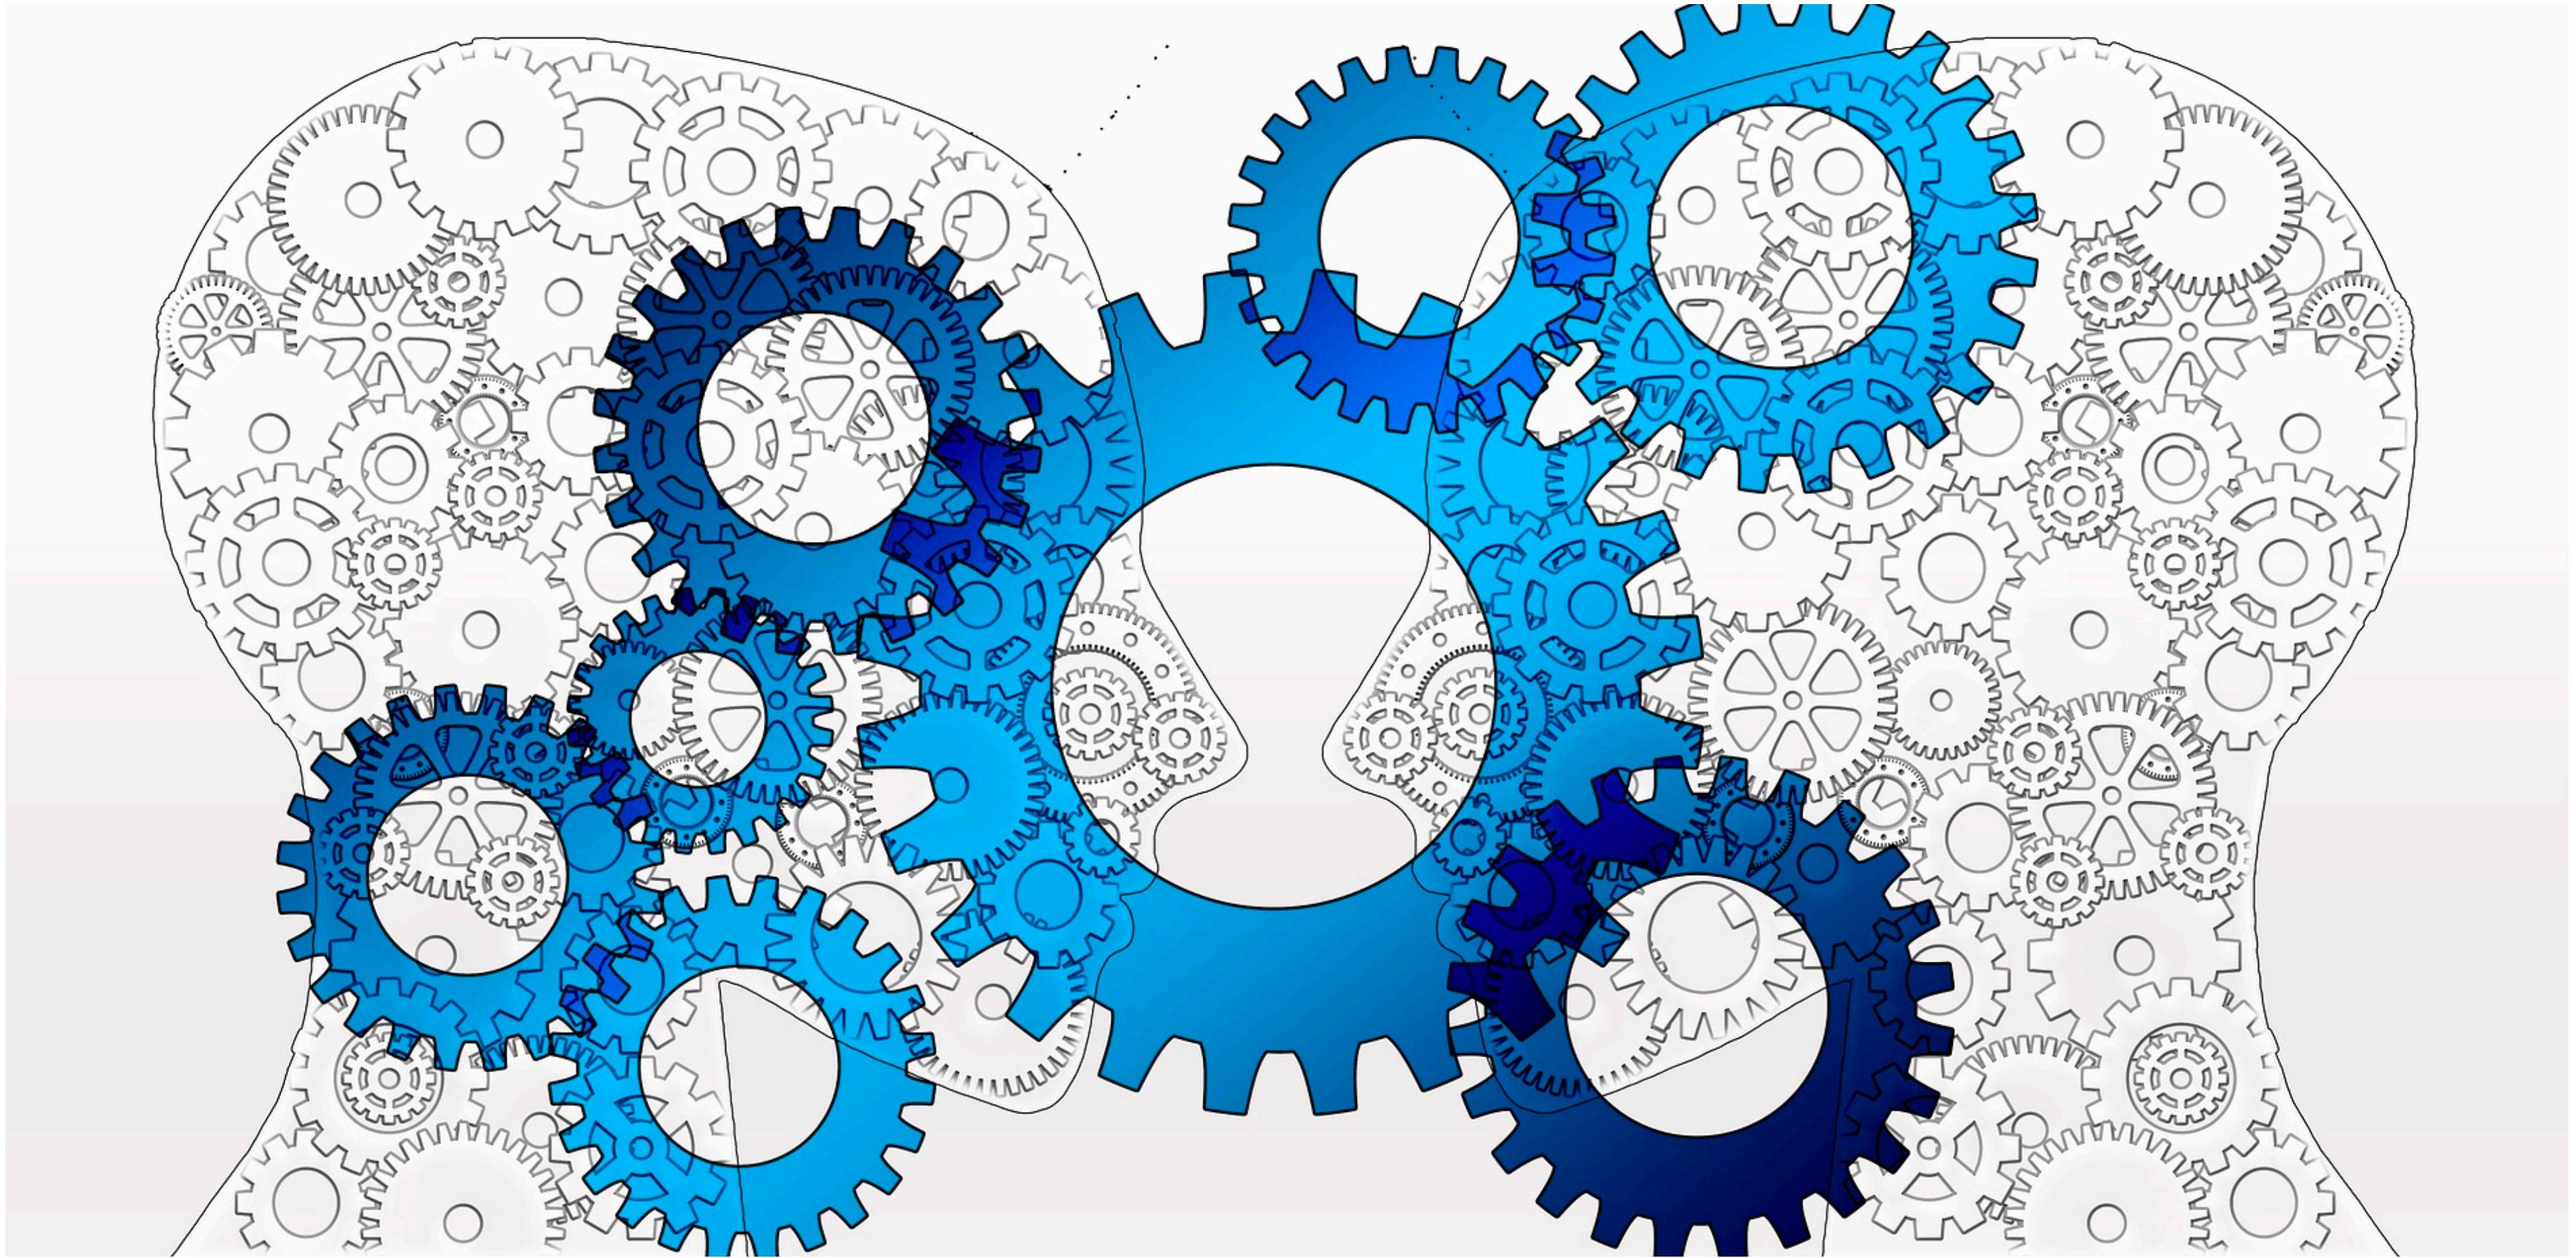

"My effort and attitude determine my abilities"

"Feedback is constructive"

"I am inspired by the success of others"

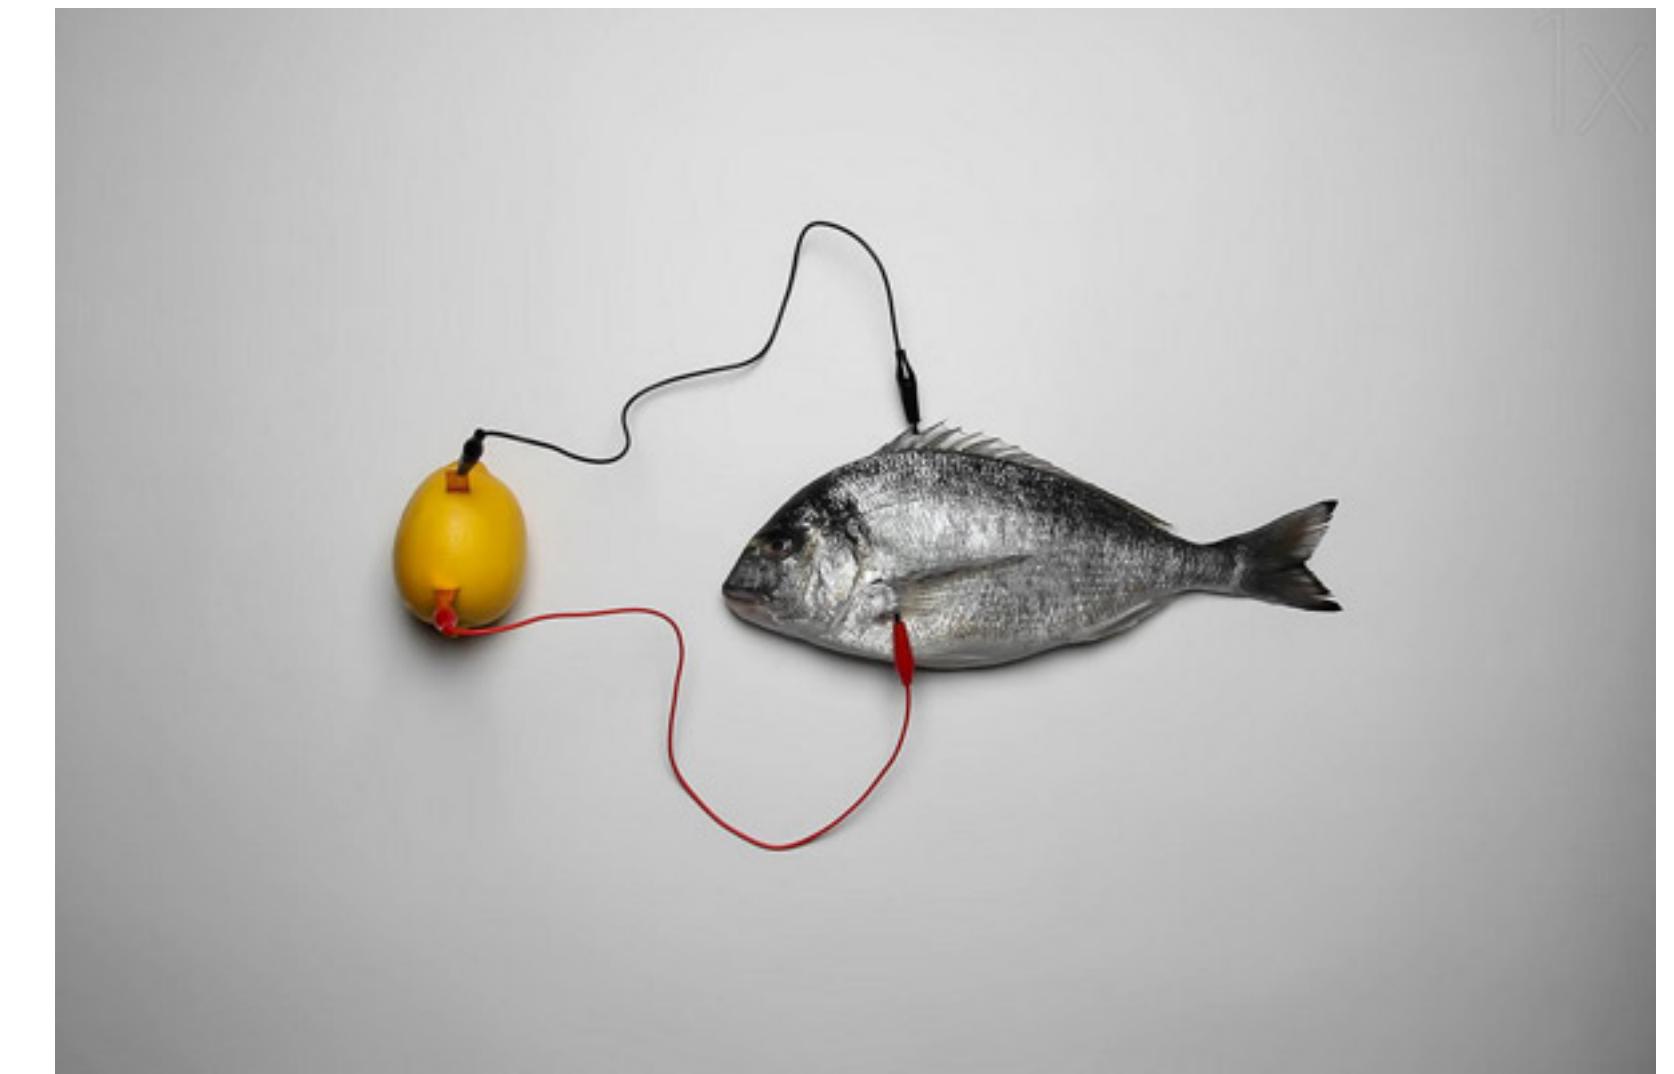

"I like to try new things"

Equip you with the knowledge of how to learn more.
And the confidence that you can.

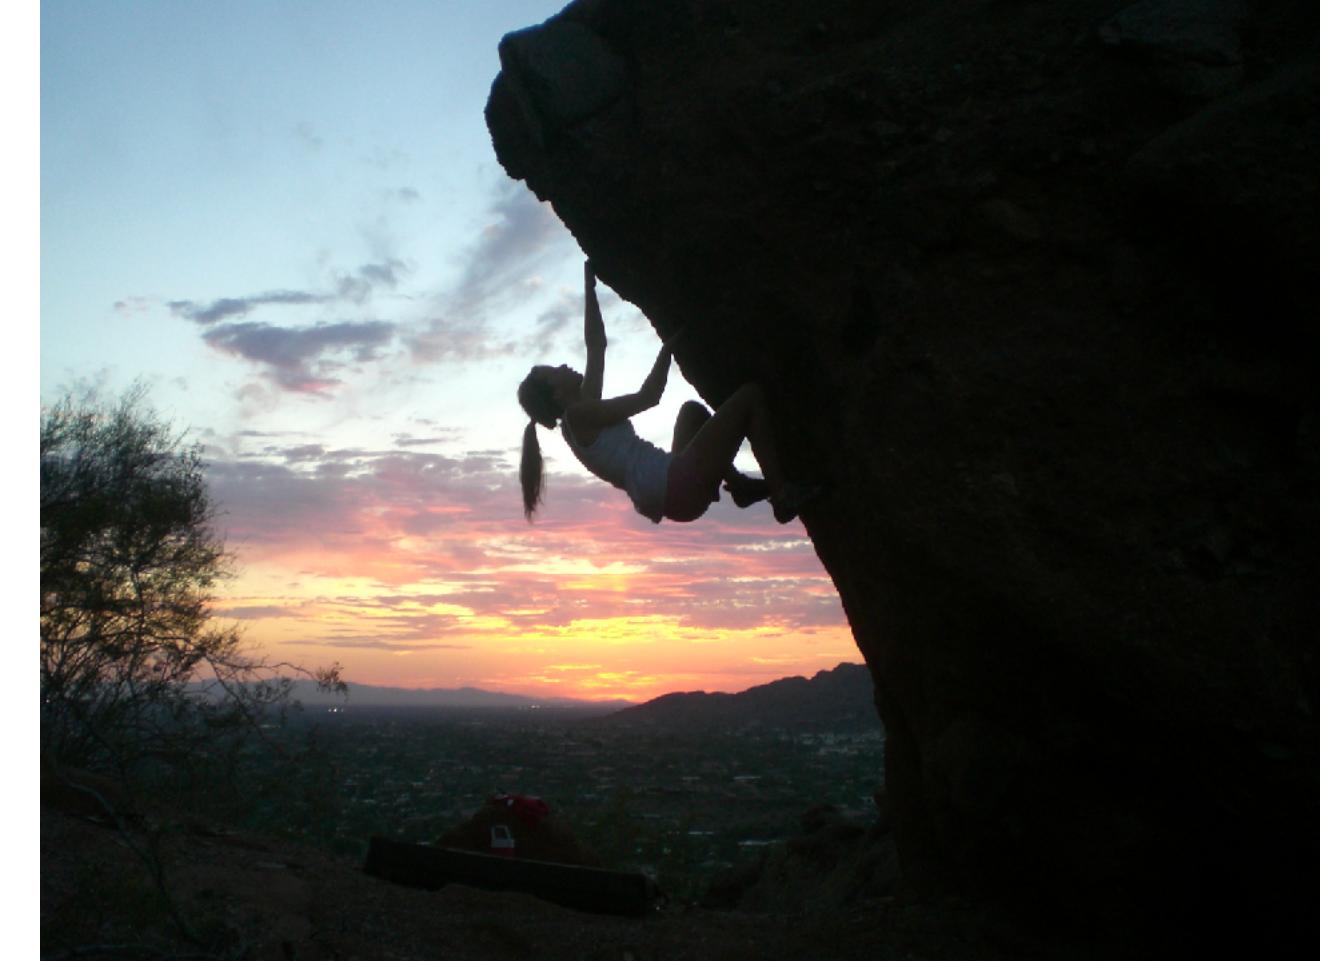

How the course is organised

The conceptual side

1 - 2:45pm Mondays

The practical side

1 - 3pm Thurs. or Fri.

Units 1 and 2 - Introduction; all about data	2
Unit 3 - Linear Regression Part 1	2
Unit 4 - Linear regression part 2, and multiple regresion	3
Unit 5 - Binary/categorical explanatory variables, and interactions	3
Unit 6 - ANOVA	4
Unit 7 - ANCOVA & Matrix alegbra	4
Unit 8 - Model selection	4
Unit 9 - Interpretation, causality, and cautionary notes	5
Unit 10 - Analysing count data	5
Unit 11 - Analysing binary data	5
Unit 12 - Measurement error; repeated measures and random effects; recap and outlook	6

Details on OLAT

The screenshot shows the OLAT interface for a course titled '22FS BIO144 Data Analysis in Biology (Preparation)'. The top navigation bar includes links for Courses, Groups, Authoring, Campus courses, Question bank, and the current course. The main content area is titled 'PREPARATION' and contains a sidebar with course navigation links such as 'BIO144', 'About the course', 'Previous knowledge', 'Wiki: FAQ', 'Forum', and 'Unit 01' through 'Unit 07'. The main content area lists various course components: 'Aims and learning outcome', 'Course schedule', 'Preparing for the course', 'Expected workload', 'Bring your own laptop', 'What to do each week', 'Course texts', 'Getting datasets', and 'Attendance'.

Introduction

The aims for this section are:

1. To help you know about your knowledge of some of the things you should already know before you start BIO144.
2. To give you a chance to refresh your knowledge about some of the things you don't recall so well.
3. **Important:** Multiple choice questions with little squares in which you need to tick the correct answers can have any number of correct answers. Such questions with little circles have only one correct answer. (See the illustrative examples in the next page.)

Please note that the things covered in this section are not exhaustive, i.e. there might be other things you've previously learned about useful for BIO144.

Your score in the quizzes here doesn't contribute to anything. It's just for you!

Graded assessment questions

The screenshot shows a course navigation bar on the left and an assessment page on the right. The navigation bar includes links for BIO144, About the course, Previous knowledge, Wiki: FAQ, Forum, Unit 01 (selected), Lecture 1, Important info, Homework, Practical, Graded Assessment 1 (selected), Assessment 1 (graded) (selected), Unit 02, Unit 03, and Unit 04. The assessment page title is 'Assessment 1 (graded)'. It contains a 'Hide description' button, a 'Information:' section with bullet points about graded tests, a 'Good luck!' message, a 'Hide' button, a yellow box stating 'There is no score information of this test since you have not taken it yet.' and 'Maximum number of attempts: 1', and a light blue box with 'Press the start button to begin with your test.' and 'Results of this test are visible to administrators and tutors of this course.' A 'Start' button is at the bottom.

Some “play” questions

The final examination

- It will involve three or four case-studies in which you have to analyses data and answer questions about it. Embedded in the case studies are some conceptual questions also.
- Quite a lot of the questions require you to answer by entering numbers that are rounded to the required number of decimal places.
- It will be in-person, on-site, and on OLAT on your own computers.
- As well as usual examination rules, you are not allowed to make screenshots of the examination questions. Anyone seen doing this will be excluded from the examination.
- It is open book, except that you are not allowed to refer to any questions from previous BIO144 final exams.

Short break

Live data analysis demonstration

BIO144
Week 1

Its a demonstration...

The idea is to give you a feel of what is involved in data analysis.

You will understand some of the demonstration.

You will not understand some of it.

Keep notes about what you don't understand.

Live data analysis demonstration

Report / communicate

The question

- What should be our question?
- As always, there are some influences and some constraints.
- We should ask a question of interest to us, and of some importance.
- And we should be able to collect the data, within our current constraints, necessary to answer the question.
- The question we will address is "***do male and female reaction times of students at the University of Zurich differ?***".
- Why this question? Reaction times are important, safety, sport...

Report / communicate

Expectation

- Quite a lot of work on this already.
- Generally, males tend to have faster reaction times than females. So we expect that to be the same for students at the University of Zurich.
- Given that you know this pattern, and you are the subjects, its interesting to see if you women can buck the trend, perhaps by trying especially hard. Though now the men know you might do this, it probably won't work!

The screenshot shows a Google Forms survey titled "My Human Benchmark results". The survey is designed for a live data analysis demonstration, specifically for BIO144, Data Analysis in Biology. It includes fields for entering a unique ID code, gender (Female, Male, Other), average reaction time in seconds, verbal memory score, and number memory score.

My Human Benchmark results

For live data analysis demonstration, BIO144, Data Analysis in Biology

*Required

Please enter the unique ID code you gave yourself. *

Your answer

What is your gender? *

Female

Male

Other:

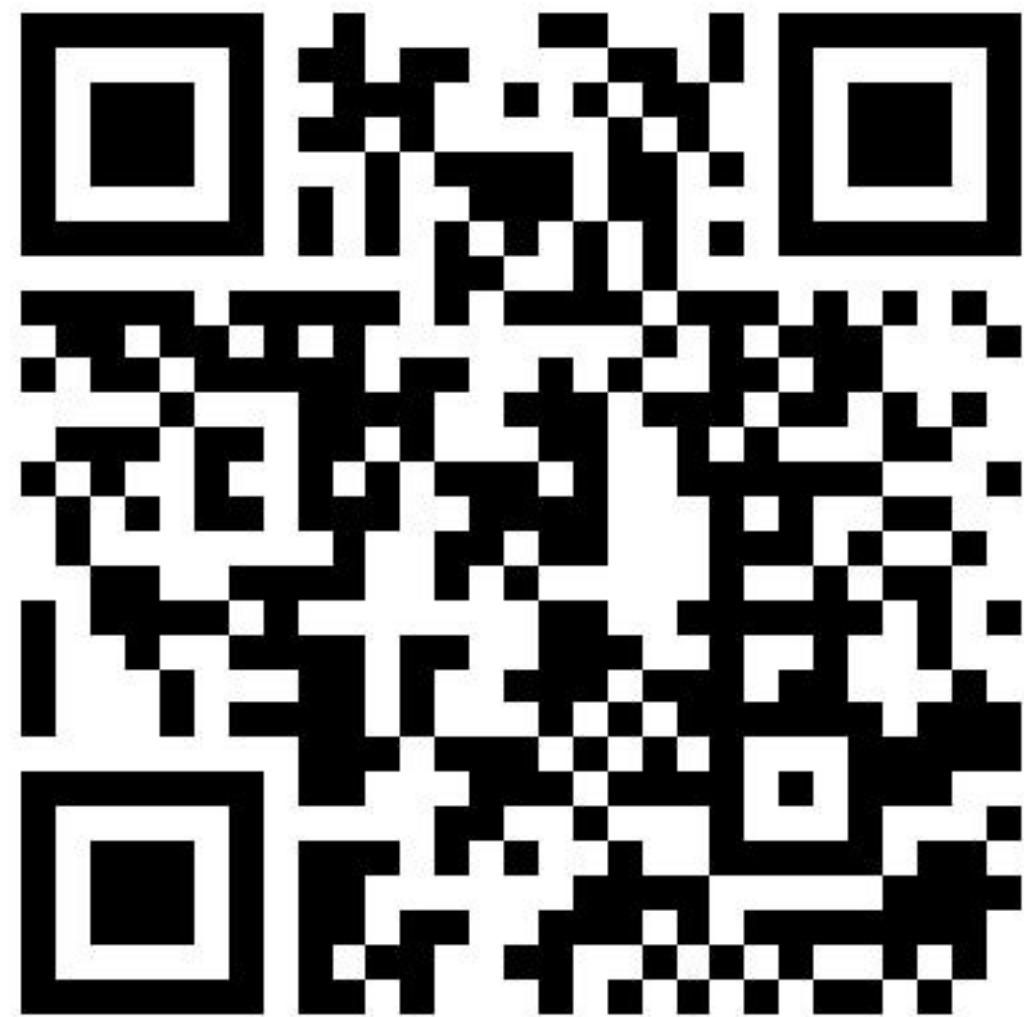

Please enter your average reaction time in seconds (e.g., 0.326). *

Your answer

Please enter your score on the Verbal Memory test. *

Your answer

Please enter your score on the Number Memory test
